(54) ACOUSTIC/IMAGE/CHARACTER INFORMATION PROCESSOR

(57)Abstract:

PURPOSE: To miniaturize the title acoustic/image/character information processor and to make it possible to personally carry the processor by forming a storage part of the processor as a card.
 CONSTITUTION: In an information processing part 1 including a 4-bit or 8-bit microprocessor unit, animation image information, the character information of words and acoustic information based upon electronic music are stored in a 4M-bit mask ROM chip e.g. The information is read out from a memory card part 2 obtained by incorporating the chip into the card and processed and the electronic music is displayed on an acoustic display part 4. On the other hand, image and character information is displayed on an image/character display part 3 relationally to the rhythm of the acoustic information.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
